

RHEA MAE NARAG

Tondo Manila, Philippines | rhea.narag22@gmail.com | linkedin.com/in/rhea-mae-narag-192891393

SUMMARY

Dedicated BSIT student with experience in front-end development, UI/UX design, database management, and network topology design through academic projects and organizational involvement. Skilled in developing functional systems, creating user-centered interfaces, and applying analytical problem-solving to technical challenges. Adaptable and eager to learn, with a commitment to applying technical knowledge to real-world projects, collaborating effectively with others, and gaining hands-on industry experience.

EDUCATION

Polytechnic University of the Philippines (PUP)

- **Bachelor of Science in Information Technology**
- **Expected Graduation Year:** 2028
- **Honors:** Consistent President's Lister (1st and 2nd Year)
- **Scholarship:** Security Bank Foundation Inc. (SBFI) Scholar

TECHNICAL SKILLS

- **Programming:** C, Python, Java, JavaScript, SQL, R, COBOL
- **Front-End Development:** HTML, CSS, JavaScript
- **Databases:** MySQL, Database Normalization, Entity-Relationship Diagrams (ERD)
- **UI/UX Design:** Figma, Canva, User-Centered Design, Human-Computer Interaction (HCI)
- **Networking:** Cisco Packet Tracer, Network Configuration & Troubleshooting

ACADEMIC PROJECTS

SALN Submission Portal & Database Design | MySQL, Python Flask, JavaScript, HTML, CSS

- Co-developed a full-stack web application alongside a student team using MySQL and Python Flask to collect and process Sworn Statement of Assets, Liabilities, and Net Worth data.
- Engineered backend database interactions and frontend validation logic, leveraging AI tools to accelerate code generation and optimize API request construction.

Enterprise Network Topology Design | Cisco Packet Tracer

- Co-designed an enterprise network architecture integrating core switches using Cisco Packet Tracer to simulate stable ISP connections through a Cisco ASA 5506-X firewall.
- Configured OSPF routing protocols and resolved physical layer interface conflicts to establish proper Layer 3 routing functionality and ensure stable external connectivity.

University Room-Booking App & Interface Redesign | Figma, UI/UX Design

- Redesigned interfaces utilizing Figma and Human-Computer Interaction (HCI) principles to build an effective visual mapping system and mitigate campus room shortages.
- Contributed to a group research paper outlining the UI/UX design process to provide theoretical support for the proposed usability solutions.

ADDITIONAL INFORMATION

- **Languages:** English, Tagalog
- **Soft Skills:** Group Collaboration, Technical Documentation, Logical Debugging, Process Optimization
